Application:		
I am applying for an access to the High precision real time position service SAPOS® HEPS . Centimetre precision for high demands of accuracy, e.g. for track guiding systems. For any new access code a one-time administrative charge of 150 € (tax included) becomes due. For new customers only: On initial HEPS registration one GPPS access code is included, it is therefore not necessary to apply for a separate application. (please mark the number of desired access codes at the right)		
I am applying for an additional access to the Geodetic post processing service SAPOS® - GPPS . Centimetre precision for high demands of accuracy, no RTK, unsuitable for track guiding systems. For the access code a one-time administrative charge of 150 € (tax included) becomes due. (please mark at the right)		
I am applying for an access to the Real time position service SAPOS® EPS . Medium to low demands of accuracy (30 to 80 cm). The access code is free of charge and usable for multiple devices. (please mark at the right)
